Career Oriented Courses (COC), Add-On Courses and Value Added Courses Offered to UG and PG Students

The globalization of education and the economy has led the current Indian higher education system to reorient and reshape its policies and programs to be more relevant and career-oriented, with a focus on quality and excellence. UGC emphasizes that by introducing Career-Oriented Courses (COC) to the students, professionally qualified graduates with a sound knowledge of their core disciplines and expertise in a concerned skill will be shaped and will have more openings in the service, industry, and self-employment sectors. NEP 2020 recommends the introduction of add-on and value-added courses that are beyond the curriculum and have the objective of helping students develop skills and competencies that enable jobs. Demand and scope for such professionally trained graduates are visible in the applied fields of almost all basic and core disciplines and faculties in the current changing global scenario and are likely to increase in the future. Accordingly, Yeshwant Mahavidyalaya, Nanded, offers the following COC, add-on, and value-added courses for empowering the students with industry-specific skills, influencing them to become entrepreneurs, and developing transferable life skills.
